Problem Statement 1:

Customers may have difficulty knowing which movies and showtimes are available. They may need to ask cinema staff for information, which can take extra time. This may also make it harder for customers to decide which movie and schedule to choose.

Problem Statement 2:

Customers may waste time waiting in line to buy cinema tickets, especially when many customers are buying at the same time. This can make the ticketing process slower and less convenient. Long lines may also cause delays for customers who are in a hurry.

Problem Statement 3:

Problem Statement

Customers may not know if there are still available seats before booking a ticket. This can make it difficult for them to decide whether to book. They may only find out about the available seats when they go to the cinema and book in person.

Problem Statement 4:

Problem Statement

Customers may need to cancel or change their booking when their plans change. Without a proper booking system, it may be difficult to update the booking and make the seat available again. This may cause seats to remain reserved even when the customer will no longer use them.

Problem Statement 5:

Problem Statement

Cinema staff may have difficulty keeping track of bookings and seat availability when records are managed manually. This may cause incorrect or outdated booking information. It may also make it harder for staff to check and update customer bookings. .

Solution on problem Statement 1:

The proposed Cinema Booking System will display the available movies and showtimes so customers can easily choose a movie and schedule.

**PROPOSED
SOLUTION**

Solution on problem Statement 2:

The proposed Cinema Booking System will allow customers to book their tickets through the system, helping make the booking process faster and more organized.

**PROPOSED
SOLUTION**

Solution on problem Statement 3:

The proposed Cinema Booking System will show the number of available seats so customers can check before booking.

**PROPOSED
SOLUTION**

Solution on problem Statement 4:

The proposed Cinema Booking System will allow customers to cancel or reschedule their booking and update the seat availability.

**PROPOSED
SOLUTION**

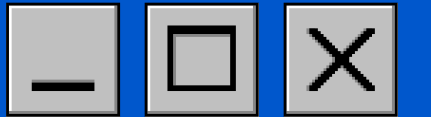

Solution on problem Statement 5:

The proposed Cinema Booking System will store and update booking records, customer information, and seat availability to make the booking process easier to manage

SYSTEM FEATURES

Payment and Total Fare
Calculation – Calculates the
total amount to be paid.

Administrative Access – Allows
the admin to manage and
control the system.

The Basic Cinema Ticketing and Management System is expected to have a positive impact on both customers and cinema staff. It can make the ticket reservation process faster, easier, and more organized. Instead of manually checking the movie schedules, seats, and bookings, the system can help the users access these details in one place.

**EXPECTED
BENEFITS AND
IMPACT**

The system can also reduce errors in ticket booking and seat management because it can automatically updates the seat availability and prevents double booking. The automatic discount feature can also help to ensure that VIP, student, and senior customers will receive the correct discount. The booking reference number and receipt can also make it easier to track and verify reservations.

**EXPECTED
BENEFITS AND
IMPACT**

For cinema staff and the administrators, the system can provide a better management of movies, schedules, seats, and the customer bookings. The search and cancellation features can save time when handling a customer requests.

The sold-out notification can also help staff and customers know when no more seats are available.
